Problem Statement

Date	07 September 2022
Team ID	PNT2022TMID11418
Project Name	Real-Time Communication System Powered by AI for Specially Abled
Maximum Marks	2 Marks

Problem Statement:

Communication between specially abled and an ordinary people has always been a challenging task. Ordinary persons cannot learn the way of communication between specially abled persons easily.

As communication needs to be faster in order to obtain the exact meaning, the system which is to be developed needs to be faster and accurate. This system should also convey the message at the time of emergency. The message should be transferred from one person to another without any change in the meaning.
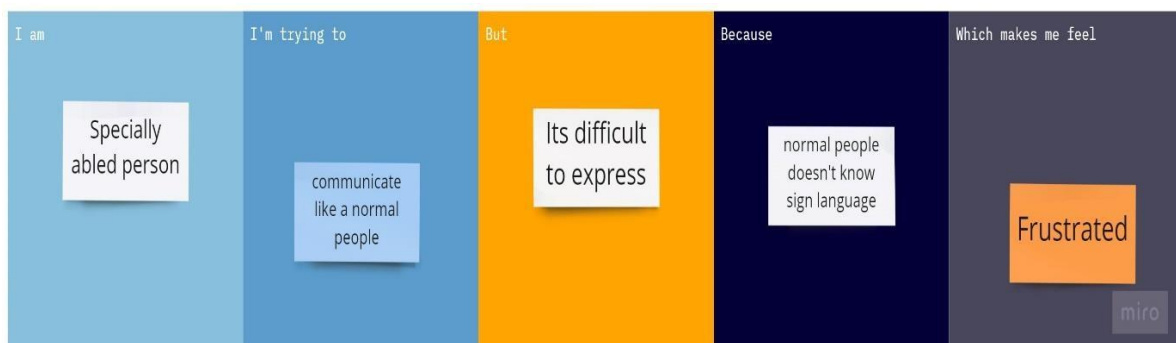

Problem Statement(PS)	I am (Customer)	I'm trying to	But	Because	Which Makes me feel
PS-1	Specially abled person	Communicate like a normal people	Its difficult to express	Normal people doesn't know people	Frustrated
